### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Crystal Wilson Reg. No. 61,730 and John Castellano Reg. No. 35,094 on 3/16/2011 at 10:50am.

The application has been amended as follows:

Claims 1-7 are allowed. Claims 1 & 7 have been amended as indicated below.

Claim 1. An interventional procedure simulation system, comprising:

a control unit and an interface unit, said control unit communicating with said interface unit to simulate handling of at least one instrument interfaced by said interface unit,

wherein said instrument is a self expanding tool inserted inside a simulated vessel, and

the control unit is ~~configured to~~ programmed to simulate said instrument with respect to a an initial set value representing a stiffness of said vessel, a rest expansion diameter of said self expanding tool, an initial inner diameter of said vessel and a spring constant for said tool.

Claim 7. An interventional procedure simulation system, comprising:

Art Unit: 3715

a control unit communicating with said interface unit to simulate handling of at least one instrument interfaced by said interface unit, wherein said at least one instrument is a self-expanding tool inserted inside a simulated vessel, and the control unit is ~~configured to~~ programmed to simulate said instrument with respect to a an initial set value representing an stiffness of said simulated vessel, a rest expanding diameter of said self-expanding tool, an initial inner diameter of said simulated vessel, and a spring constant for said self-expanding tool; and

an interface unit, said interface unit including a detecting member adapted to detect a thickness of said at least one instrument, and an optical sensor adapted to detect the presence of said at least one instrument in the interface unit,

wherein said control unit is further ~~configured to~~ programmed to measure a longitudinal movement and a movement of rotation of said at least one instrument and providing a force-feedback in a longitudinal direction and in a direction of rotation of said at least one instrument according to a received force and torque.

### **Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance: None of the cited patents and publications used separately or together does not teach the argued/claimed invention especially the limitation where the control unit is programmed to simulate said instrument with respect to an initial set value representing an stiffness of said simulated vessel, a rest expanding diameter of said self-expanding tool, an initial inner diameter of said simulated vessel, and a spring constant for said self-expanding tool. Further, these parameters determine how the simulator sets the boundaries for the

Art Unit: 3715

expansion of the instrument and (simulated part) of the vessel. This application is allowed for the same reasons and arguments made by the applicant during the prosecution of the application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**
